

- Roof Cleaning:

Being Ontario's first Roof Cleaners, at Total Clean Team we know how important it is to keep an attractive image or even increase the curb appeal of your home, while keeping the investment of your roof clean and protected. Our trained professionals at Total Clean Team, have built our reputation of roof cleaning on all types, therefore being known as the leaders in the industry. We offer the most cost effective roof cleaning services, saving you thousands on unneeded replacements.

Homeowners in the Ontario are consistently replacing their roofs prematurely due to the damaging effects of moss, lichen or black streaking (mold). These organisms feed off the organic material in shingles. In other words, they eat your roof. The longer they go untreated, the more damage they will cause.

The Total Clean Team approach maximizes roof life, our Soft-washing procedure is gentle and non-abrasive yet highly effective and efficient, giving us the ability to treat and ensure your roof is free of infestations. We specialize in the proper care of your Roof. Using our tested solution and proven to work system, your roof will look its best and last significantly longer than leaving it uncleaned.

Call us today, and we will put together an affordable, customized cleaning solution regardless the size of your Roof.

- Wood Cleaning, Sealing and Staining:

We delight ourselves on our abilities to Clean patios and driveways, but we're also experts at taking over worn-out, beat-up wooden decks and remodeling them back into stylish additions again. With a Total Clean Team deck cleaning and sealing, you gained outdoor living the whole family will enjoy.

Deck fundamentals

without proper care, timber wears down, sunlight fades colour, rain and snow beat it up, while mold and mildew attack leaving a unwanted look. Having a neighborhood power washer spray it down runs the large risk of gouging the timber, costing a great deal in repairs. We're cleaning specialists, and taking sensitive care of your timber surfaces while cleaning, sealing or staining them is what we're devoted to.

We use our own tested solution that we are extraordinarily happy with, we coat deck surfaces and allow soaking for 10 – 15 minutes, this lifts different particles from the wood. Next, the Solution is lightly washed away, taking dirt debris and the old, beat-up gray wood fibers with it despite the fact that your deck seems first rate proper now, we have to defend it from the UV rays and weathering that will come. That's why we offer a sealant or stain, treating the whole deck, shielding the wood and seals pores. This maintains timber from weathering, also makes the wooden surface more inviting, further extending its life. Now, your deck has no effects from heavy downpours, bad winter snowfalls and summers burning U.V rays. — it's secure from each.

When it comes to deck cleaning, sealing or staining, Total Clean Team is about zero hassle for you and total transformation of your deck.

- Siding Cleaning and Protecting:

Giving Life Back To Your Home - There's a high-quality line among pressure washing siding and gouging it away. Many companies use power so robust that it is able to bite apart nearby greenery or consume chunks out of your siding. Wrong one twist to bend can cause costly damage. thanks to our proven to work cleansing system, we don't need that type of damaging pressure. A pre-cleaning solution sprayed on your siding, kills mold, mildew and fungus while loosening and lifting dirt. Then we follow up with a low-pressure rinse: and siding comes out glowing clean, and your landscaping remains intact.

Science or Art? We say both, at Total Clean Team we have mastered the science, which lays in our proprietary cleaning system combined with our tested solution, the art is our outstanding service which starts with a free estimate and is back by one of our trained and qualified teams. Giving your siding a Total Clean Team clean will make your home stand out like a masterpiece. Make your home look like new again. Call Total Clean Team today.

- Pavers or Stone Cleaning and Protecting:

Pavers and natural stone are increasing popular choice for an outdoor living space. They are very durable with their own unique beauty. however, they are uncovered to the outdoor elements and require care to keep them looking fresh. Examine directly to analyze the greater elements that stain or harm your stone work and the way proactive cleansing and sealing can preserve their beauty.

Some outdoor elements that harm your stone could be:

Oil

Grease

mold & algae increase

Salting
